#### Course Aim

The aim of Story Through Art is to create an experiential, fun, engaging art course that teaches children a bit more about our host country. By using mixed media and a compounded project, our students will create a bit more each week culminating in a final keepsake that is both beautiful and a tribute to Qatar National Day.

We will build anticipation through weekly deliveries of our signature CreateKits – each week a kit of supplies will give them everything they need to complete that portion of the project. The Story Through Art will not only teach about history via storytelling, but students will also acquire painting and molding techniques and will have opportunities to improvise and “think outside the box”.

Our artists will unleash their creativity and will guide them step by simple step on creating a fabulous final artwork. Although the materials delivered will be enough to complete the project, students will be encouraged to improvise their creativity without limit using recycled, common household items, such as empty plastic water bottles.
